

**LIST OF LICHEN SPECIES FROM THE
BRITISH CHECKLIST (COPPINS 2007)
REPRESENTED IN THE BRITISH LICHEN
HERBARIUM AT THE NATURAL
HISTORY MUSEUM (BM).**

Compiled by Scott LaGreca & Amanda
Waterfield

Last update: 14 January 2008.

Note 1: Entries in normal font are present in the British Lichen Herbarium. Entries in italics are not yet present (if you have a good specimen of any of the italicised species, please send it to the Lichen Curator at BM).

Note 2: although this list includes related non-lichen fungi (# and ##), they are not yet fully integrated into the British Lichen Herbarium. [Many are held at Kew (K), however.]

Note 3: Numbers after species names are the species numbers in the Coppins Checklist.

For various reasons, the following taxa are not listed in Coppins' Checklist, but are filed in the British Lichen Herbarium anyway:

- Botrydina spp.
Lecanidion atrata
Roeseleria hypogaea
Sarea difformis
Sarea resinae
Seuratia millardeti
Spilonema scoticum
Splanchnonema scoriadea

In addition, the following taxa, which have been incorrectly reported from the British Isles, are filed as indicated:

Cladonia acuminata—in folder at beginning of *Cladonia* [these are Crombie specimens thought to have originated outside the British Isles]

Cladonia turgida—in folder at beginning of *Cladonia* [these are Crombie specimens thought to have originated outside the British Isles]

Varicellaria rhodocarpa—filed as *V. rhodocarpa*
